Sorbitol
Sodium Cocoate
Palm Fatty Acid
Coconut Fatty Acid
Pentasodium Pentetate
Tetrasodium Etidronate

Organic Palm and Coconut Oil Soap Bases

Crystal ORG is produced using 100% certified organic oils. These oils are certified by internationally-recognised bodies such as the Soil Association. Soil Association organic certification ensures the integrity of the products in relation to the environmental impact of their farming and the long-term sustainability of the crops. No chemical fertilizers or pesticides are permitted in the growing of the crop. The same stringent controls apply in the extraction and refining of the oils from the crop for example no bleaching or chemical distillation is permitted.

Crystal ORG contains the natural glycerine from the organic oil, something that is normally chemically removed as part of the refining and distillation process, this gives superb skin feel characteristics and removes the negatives associated with a chemically refined product. It not only protects the environment from intensive farming methods and chemical treatment of natural ingredients but also pass these benefits directly to your skin.
