

1st August 2022

Product Notification – Removal of Pentasodium Pentetate / Updated INCI

Following the reclassification of Pentasodium Pentetate Stephenson has reformulated all products which contain the chelate as it will be prohibited in cosmetic and personal care products. The cosmetics industry has been given an off-shelf deadline of 1st December 2023 to remove all products containing Pentasodium Pentetate from the market.

Stephenson will replace Pentasodium Pentetate with Tetrasodium Iminodisuccinate for all orders despatched from 1st November 2022.

We are writing to tell you the INCI will be affected by this change and we are supplying you with revised INCI lists for each product affected.

As we are required to make this change to our product paperwork, we are also making some other small adjustments to the INCI and specification.

The updated INCI, specification and product declaration will be sent to you by your account manager.

Yours sincerely,

Michaela Daubney

Product Manager
