General classification of the mixture: the mixture is classified as hazardous in accordance to Regulation 1272/2008/EC (CLP).		
	Important health effects:	Direct contact with eyes may cause serious eye damage. Irritating to skin. Prolonged or repeated contact with the skin can cause drying and defatting of the skin. Swallowing of larger amounts may lead to stomachache, vomiting or diarrhea. Attention in case of vomiting - acute danger of suffocating produced by foaming ingredients.
	Important environmental effects:	Based on composition, no adverse effects in the environment are expected for the mixture; therefore the mixture is not considered as dangerous for the environment. The surfactants contained in this preparation comply with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents.
2.1	Classification of the substance or mixture	
	Classification (1272/2008/EC)	Skin Irrit. 2 Skin corrosion/irritation, category 2 H315 Causes skin irritation. Eye Dam. 1 Serious eye damage/eye irritation, category 1 H318 Causes serious eye damage.
2.2	Label elements	
	Contains:	Alcohols, C12-14, ethoxylated, sulfates, sodium salts; Sodium laurate

1	Observe all user considerations and safety measures stated on the packaging. Effects of over exposure: There are no hazards under normal use conditions. In case of any health problem or uncertainty seek medical attention and provide information from this Material Safety Data Sheet. Unconscious persons place in the stabilized position and observe the breathing. Never give any fluids to unconscious persons.	
	Inhalation:	Inhalation of vapours / aerosols is not expected to cause any adverse effects. In case of individual problems following the aerosols inhalation, remove the affected persons to a fresh air. Administer oxygen or artificial respiration if there is difficulty breathing; until medical attendance. Seek medical advice if the symptoms persist.
	Skin contact:	Remove all soiled or stained clothing. Wash the affected area immediately and repeatedly with soap and water. Seek medical advice if the skin irritation persists.
	Eye contact:	Keep eyelids open and rinse immediately and repeatedly with copious amount of water for at least 5 - 10 minutes. Remove contact lenses if present. Seek medical advice (preferable an ophthalmologist) if the irritation persists.
	Ingestion:	Wash mouth with water; give some water to drink (only if the affected person is conscious). Do not induce vomiting! In case of spontaneous vomiting avoid aspiration of the vomits. Get medical attention if symptoms persist and show this Material Safety Data Sheet, product package or label!
4. 2	Most important symptoms and effects, both acute and delayed Direct contact with eyes may cause serious eye damage. Irritating to skin. SECTION 5: FIREFIGHTING MEASURES

5.1	Extinguishing media	
	Suitable extinguishing media:	water spray, foam, dry-powder, carbon dioxide
	Unsuitable extinguishing media:	direct water stream
5.2	Special hazards arising from the substance or mixture	
		Non-flammable - water solution. Upon water evaporation - incomplete combustion and high-temp thermolysis may produce toxic, irritating and flammable decomposition products (such as carbon monoxide, carbon dioxide, sooth, aldehydes and other products of organic compounds decomposition, sulphur oxides etc.).
5.3	Advice for fire-fighters	
		<u>Fire Fighting Procedures:</u> Keep people away. Isolate fire and deny unnecessary entry. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of re-ignition has passed. Fight fire from protected location or safe distance. Do not use direct water stream. May spread fire. Move container from fire area if this is possible without hazard. <u>Special Protective Equipment for Firefighters:</u> Wear positive-pressure self-contained breathing apparatus (SCBA) and protective firefighting clothing (includes firefighting helmet, coat, trousers, boots, and gloves). Avoid contact with this material during firefighting operations. If contact is likely, change to full chemical resistant firefighting clothing with self-contained breathing apparatus. If this is not available, wear full chemical resistant clothing with self-contained breathing apparatus and fight fire from a remote location. For protective equipment in post-fire or non-fire clean-up situations, refer to the relevant sections.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6. Personal precautions, protective equipment and emergency procedures

1

Observe all user considerations and safety measures. No special requirements are needed under normal use conditions. Avoid contact with skin, eyes and mucous membranes. According to the release scale, use appropriate other personal protection (gloves, mask, protective clothes, see Section 8). All unprotected persons should be restraint. Do not inhale vapours or decomposition products. Ensure adequate ventilation in closed areas. Contaminated surfaces may be slippery - cover with sand, earth etc. or wash with large amount of water. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

6. Environmental precautions

2

Stop leak if you can do so without risk. Confine the spill immediately with booms. Avoid entering soil, drains, surface- and ground-waters. Possible adverse effects in the environment can be mitigated with appropriate dilution with large amount of water. In case of serious leakage inform appropriate authorities.

6. Methods and materials for containment and cleaning up

3

Suck-up, soak up the rests with inert absorbent material (sand, diatomite, kaolin, vapex...). Collect in suitable and properly labeled containers. Dispose according to valid legislation; send to wastes treatment facility (see section 13). Clean up affected areas with lots of water.

6. Reference to other sections

4

Adhere to instructions in the section 8 and 13.

SECTION 7: HANDLING AND STORAGE

7. Precautions for safe handling

1

Observe all user considerations and safety measures. No special requirements are needed under normal use conditions. Avoid contact

	<u>Appropriate engineering controls:</u> Avoid contact with skin, eyes and mucous membranes. Ensure adequate ventilation. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Personal protective equipment selections vary based on potential exposure conditions

such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Individual protection measures, such as personal protective equipment:

a) Eye / face protection

Always use safety glasses with side shields or full-face shield (EN 166). Chemical type goggles should be worn during misting operations.

b) Skin protection:

Always use chemical-resistant gloves when manipulating the mixture. If contact with forearms is likely, wear gauntlet-style gloves. CEN standards EN 420 and EN 374 provide general requirements and lists of glove types. Recommended materials: polyvinylchloride (PVC) > 0.7 mm coating thickness, chloroprene rubber > 0.5 mm coating thickness; nitrile rubber (NBR) > 0.4 mm coating thickness. Protective index 6, corresponding > 480 minutes of permeation time according to EN 374. Always immediately replace worn or damaged gloves

Note: Glove suitability and breakthrough time will differ depending on the specific use conditions, such as other chemicals, physical factors (risk of cutting / tearing, thermal damage). Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves.

c) Respiratory protection:

No special requirements are needed under normal use conditions. Do not inhale vapours or aerosols. Ensure appropriate ventilation or exhaustion at the workplace. If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements,

if applicable. Types of respirators to be considered for this material include: half-face organic vapours / particle filter respirator, type A/P2 filter (European Committee for Standardization (CEN) standards EN 136, 140 and 405 provide respirator masks and EN 149 and 143 (STN EN 14387+A1) provide filter recommendations). Remember that the filter use is time-limited. Always observe manufacturers recommendation.

d) Thermal hazards:

No such risk when normally used.

Environmental exposure controls:

Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.

All storage and manipulation areas have to be equipped for the sanitation of possible leakage. See information in sections 6 and 12. Adhere to requirements of the Act No. 137/2010 Coll. on air protection (*Air Act*) as amended and the Act No. 364/2004 Coll. on waters (*Water Act*) as amended.

- .6 Material does not decompose at ambient temperatures. If fire is involved: upon water evaporation - incomplete combustion and high-temp thermolysis may produce toxic, irritating and flammable decomposition products (such as carbon monoxide, carbon dioxide, sooth, aldehydes and other products of organic compounds decomposition, sulphur oxides etc.).

SECTION 11: TOXICOLOGICAL INFORMATION

11 Information on toxicological effects

- .1 The mixture was not toxicologically tested; classification is based on the conventional calculation method. Information on toxic effects is based on the effects of compounds.

Note: this product and contained raw materials are in full compliance with the European Cosmetics Regulation (EC) N° 1223/2009 relating to perfumery and cosmetic products and that they have not been tested on animals. No animal tests on the finished product, its prototype or on any of the ingredients contained in the finished product or its prototype have been commissioned either in European Union or outside the European Union. All data mentioned below are readings from the scientific literature.

- a) *Acute toxicity*
Based on available data, the classification criteria are not met. Based on composition, no acute toxic effects are expected in applicable amounts.

SECTION 12: ECOLOGICAL INFORMATION

12 Toxicity

.1 The mixture was not ecotoxicologically tested; classification is based on conventional calculation method. Information on ecotoxic effects is based on the effects of compounds. Based on composition, no adverse effects in the environment are expected for the mixture; therefore the mixture is not considered as dangerous for the environment.

12 Persistence and degradability

.2 Information for the mixture not available.

12 Bioaccumulative potential

.3 No data for the mixture. Based on composition, bioaccumulation is not expected. The surfactants contained in this preparation comply with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents. Data to support this assertion are held at the disposal of the competent authorities of the Member States and will be made available to them, at their direct request or at the request of a detergent manufacturer.

12 Mobility in soil

.4 No data for the mixture. Soluble in water (unlimited).

12 Results of PBT and vPvB assessment

.5 The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII; the substances in the mixture are not included in the Candidate List of SVHC

12 Other adverse effects

.6 Not known.

This Safety Data Sheet is compiled in accordance with Regulation EC No. 1907/2006 (REACH), Regulation EC No. 1272/2008 (CLP) and Commission Regulation EU No. 2015/830; Safety Data Sheet contains information on safety use, occupational health protection, and environmental protection. The information contained herein is given in good faith and is accurate to the best of knowledge at the date indicated above. This particular information applies on the product as supplied and may not be valid in mixtures with other substances. If used for other purposes as identified in this SDS, the distributor is not liable for any damage.

The information given herein in no way dispenses the user from knowing and applying all provisions regulating his activity. The user bears sole liability for the precautions required when using the product. The regulatory texts indicated herein are intended to aid the user to fulfill his obligations. This list is not to be considered complete and exhaustive. It is the user's responsibility to ensure that he is subject to no other obligations than those mentioned.
